Nyrstar Smelter Transformation – Another Step Forward

The arrival of modules for the transformation is another step forward in the project which is transforming the Smelter.

Geoff welcomes the latest milestone in the \$563 million redevelopment of Nyrstar's facilities at Port Pirie.

Geoff said, "The arrival in Port Pirie of the latest shipment for the Port Pirie Redevelopment is a further sign that substantial progress is being made in this major investment in the future of Nyrstar and the region."

"Already all the piling for the furnace, acid plant and oxygen plant have been completed and foundations are close to being completed."

"In the next couple of days, this shipment of modules, pipe racks and other components will be transported from Berth 5 at Port Pirie to the site of the new acid plant.

Together with the people of Port Pirie, Geoff is looking forward to the successful completion of the redevelopment next year and the environmental and health benefits that will flow to the community.
